

Blair Athol Mine

Overview	Mining and production	Sustainable development	Community engagement	Library
--------------------------	---------------------------------------	---	--------------------------------------	-------------------------

Blair Athol Mine seeks to be more than just a major source of local employment and economic growth, rather to work in partnership with the local community. Through Rio Tinto Coal Australia's [community relations programme](#) and the [Clermont Community Development Fund](#) the mine is working to help provide positive long term outcomes for the Clermont region prior to the opening of Clermont Mine.

The Clermont Community Consultative Committee (CCC) includes members of the Clermont community and representatives from Rio Tinto Coal Australia. The group meets quarterly to discuss the Clermont and Blair Athol mines. CCC documents including meeting minutes, key points from meetings and the CCC Charter can be found in the [Blair Athol Mine library](#).

2009 Sustainable development report

Blair Athol scorecard			
Area		2008	2009
Employees	Male	199	184
	Female	18	22
	Total	217	206
Saleable production (million tonnes)		10.1	11.3
Lost time injury frequency rate (LTI)		0.88	0
